

Article: Aqua Perl

Article-no.: 2283

Material description:

Aqua Perl is a translucent roller blind fabric with a water repellent (non-hygroscopic) coating on both sides. This makes the fabric especially suitable for usage in humid rooms (e.g. bathrooms).

Fabric characteristics:

- extremely soil and water repellent by means of fluorcarbon finishing
- Nano-protected
- mold resistant (fungistatic finish) *
- washable (mild detergent, 30° + rinse with clear water)
- dimensional stability, even in humid areas
- high resistance to tearing
- odour-free
- no sticking when pulling down
- scratch resistance
- no white marks when folded

Ecological information:

The coating consists of aqueous polymer dispersion. Dyeing is effected by selected pigments.

Fabrics are manufactured without addition of harmful ingredients such as PVC, CFC, formaldehyde or other organic solvents, antimony, halogen compounds or AZO-pigments of class MAK III A1, III A2 or III B.

Article can be disposed to a controlled landfill.

Manufacturer's Processing Instructions:

When using the fabric "length for drop", we recommend that both edges should be trimmed equally (minimum 5 cm) in order to minimize tension difference.
